Who is the course for?

SAP Basic Navigation in English is aimed at unemployed jobseekers who want a broad introduction to SAP and the business processes SAP supports. It may be relevant if you have experience within areas such as: Finance or accounting, administration, purchasing, logistics, supply chain, production, sales, customer service, HR, project management, IT or ERP systems. You do not need to be a programmer or an IT specialist. In fact, much of SAP is about understanding business processes rather than technology. The course can also be a useful first step if you later want to specialise in areas such as SAP Finance, Controlling, Procurement, Sales or Business Intelligence.

Kursets opbygning

SAP Basic Navigation in English is a six-week online course for unemployed jobseekers. Most of the learning is self-paced through SAP Learning Hub. You follow SAP's official learning material and complete exercises in SAP's practice environments. The programme is mentor-supported and includes live sessions where you can ask questions, discuss the material and get help if you run into problems.

Approval and price

The course is approved for inclusion on several regional "positive lists." Therefore, your job center must authorize your participation in the course. Contact us if you have questions or need assistance – for example, in creating a training plan to attach to your application to the job center.
